

# ISFD 2.0.6

## Functional Release Notes

### August 22, 2006

ISFD 2.0.6 is tentatively scheduled to deploy the weekend of September 9<sup>th</sup>. The following is a description of changes to ISFD functions for Release 2.0.6.

## FEATURES

### New Features

- The primary purpose of ISFD v2.0.6 release is to implement new password rules
- In addition, the language is changed on the facility verification notice for classified shipments:  
“Classified shipments not to exceed two cubic feet. Larger size shipments require prior coordination with the Facility Security Officer to confirm storage capacity.”

### Corrections Made to Existing Features

- IS Reps with credential numbers beginning or ending with ‘6’ will be able to generate reports.
- Requestor information will not clear when the reset button is selected for Facility Verification Requests.
- The Field Office code will automatically populate in the Facility Profile.
- The ‘Modified By’ field will reflect who performed the last update to the facility action.
- The ‘Updated By’ field will reflect who performed the last update to the facility record.
- ‘FOUO’ will appear on printed reports (does not apply to mailing lists).
- Mailing list corrections:
  - Terminated facilities will not appear on mailing list.

- Mailing label format is corrected.
- Facility category will no longer be printed on the label, but the report will continue to be grouped by category and each category sorted in alphabetical order.
- In ISR Management, when selecting a Rep's facilities under 'Select Search ISR,' the second page of the facility list will display.
- Facility clearance will not be verified when facility record reflects special consideration and was flagged 'Do not verify'.
- The safeguarding screen can be updated for facilities issued interim Top Secret facility clearances.
- The 'Next Assessment' report will reflect facilities that were migrated from other systems for which the facility category was blank and/or the 'UA Oversight' was blank.
- When new facility records are created, they will immediately appear under 'My Facilities'.
- When an address is modified, the 'authorized to verify' setting will not change.
